SUMMARY

Computer Science graduate with hands-on experience building end-to-end ML pipelines using Python, Scikit-learn, and PyTorch, working with large-scale datasets (28M+ records), and deploying models via Flask and Streamlit. Experienced in NLP, supervised learning, feature engineering, and model evaluation. Currently interning as a Data Science professional at InfozIT Solutions and pursuing a Post Graduate Certification in Data Science at IIT Guwahati.

TECHNICAL SKILLS

ML Frameworks & Libraries: PyTorch, Scikit-learn, NLTK, XGBoost, Random Forest, Ridge Regression, NLP pipelines, TF-IDF

Programming: Python (primary), SQL, Pandas, NumPy, SciPy, GeoPandas

Deployment & Tools: Flask, Streamlit, Vercel, Git, GitHub, Jupyter Notebook, VS Code

Data Skills: EDA, Feature Engineering, Data Cleaning, Data Preprocessing, Matplotlib, Seaborn, Power BI, Excel

Mathematics: Probability & Statistics, Linear Algebra, Algorithm Design, Model Evaluation & Regularization

INTERSHIPS

Data Science Intern | InfozIT Solutions, Secunderabad, Telangana

Mar 2026 – Present

- Developing and deploying ML models for real-world client projects; building end-to-end data pipelines covering data preprocessing, feature engineering, model training, evaluation, and deployment of analytical solutions.
- Contributing to client projects with insights-driven decision making through iterative model improvement and continuous data pipeline development on large-scale field data.

Data Science & Analytics Intern | Vital Skills × IIT Kanpur Techkriti

Jul 2024 – Aug 2024

- Completed Data Science and Analytics internship (Certificate ID: VS-SI-779); applied SQL-based data extraction, statistical analysis, and ML model evaluation on structured datasets to generate KPI insights for non-technical stakeholders.

PROJECTS

1. AP Rainfall Early Warning System

[Live](#) | [GitHub](#)

Python, Scikit-learn, GeoPandas, Flask, Leaflet

- Trained an ML-based flood risk classification model on 28M+ village-level rainfall and GIS records; applied large-scale data preprocessing, feature engineering, and iterative model evaluation to categorize flood alert levels across districts.
- Deployed via a Flask web application with an interactive Leaflet map dashboard, enabling real-time flood risk visualization across Andhra Pradesh for actionable early-warning decision support.

2. Email & SMS Spam Detector

[Live](#) | [GitHub](#)

Python, Scikit-learn, NLTK, TF-IDF, Streamlit

- Built an NLP-based binary classification pipeline using TF-IDF feature extraction and text preprocessing (tokenization, stemming, stop-word removal); trained and compared Naive Bayes, SVM, and Random Forest classifiers.
- Evaluated models using precision, recall, F1-score, and ROC-AUC metrics; deployed as a real-time Streamlit application demonstrating end-to-end supervised learning from problem formulation to deployment.

3. Bangalore House Price Predictor

[Live](#) | [GitHub](#)

Python, Scikit-learn, Ridge Regression, Pandas, Flask, Vercel

- Analyzed 13,000+ property records; applied feature engineering, outlier removal, and dimensionality reduction to build a Ridge Regression model with cross-validation; evaluated using RMSE and R^2 metrics.
- Deployed as a live Flask app on Vercel for real-time price predictions by location, BHK, and area inputs.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2021 – 2025

RSR Rungta College of Engineering & Technology, Bhilai, Chhattisgarh

CGPA: 7.3 / 10

Higher Secondary Certificate (Class XII)

2020 – 2021

Nagsen Higher Secondary School, Bhilai, Chhattisgarh

Percentage: 91.6%

CERTIFICATIONS

- **Post Graduate Certification in Data Science** – E&ICT Academy, IIT Guwahati (*Pursuing, 2026*)
- **Machine Learning for Beginners** – Simplilearn SkillUp (*2026*)
